EDUCATION

National Institute of Technology, Tiruchirappalli

Master of Computer Applications, CGPA: 7.63

July 2018 – June 2021

Tiruchirappalli, Tamil Nadu

EXPERIENCE

Quoqo Technologies (P) Ltd

Engineer II

November 2023 – Present

Bengaluru, Karnataka

- Contributed to the development of **Quoqo Fusion**, an all-in-one legal management platform for Quoqo, an early-stage legal tech startup, by integrating features such as electronic signatures, AI-powered document review, an online in-built editor with multiple AI plugins, and secure document storage.
- Designed and implemented key features including E-signature, DSC, Aadhaar-based signing, digital stamps, and license generation for reseller billing using React, Python, Django and AWS; enabled Office 365 integration for seamless collaboration; and enhanced platform usability by addressing bugs, improving features, and ensuring user-friendliness.

Halliburton Development Center India (LLP)

Software Developer

March 2022 – August 2023

Bengaluru, Karnataka

- Worked on DS365.ai Dashboard to provide users with a one-stop solution for implementing various Machine Learning Algorithms.
- Developed the User Interface from scratch using ReactJS components and collaborated with APIs, developed in Python, to fetch and display dynamic data, enhancing the user experience and ensuring seamless data integration.
- Demonstrated expertise in efficient debugging and troubleshooting using ReactJS, JavaScript, and Python to facilitate production support L3 for robust problem resolution in live environments while maintaining system reliability and performance.

HSBC Electronic Data Processing India Private Limited

Analyst

March 2021 – March 2022

Kolkata, West Bengal

- Developed a Monitoring Dashboard using Python, Dash, and CSS to generate multiple graphs on a single platform and use CRMI as a database
- Created a Python email template that generates email newsletters automatically based on the team's internal update on confluence.

Trawello HealthyKID

Intern

December 2019 – January 2020

Trichy, Tamil Nadu

- Worked on Health Tracker Web Application, which stores and visualises student health implications based on physical tests and checkups.
- Implemented REST API for authentication and user registration.

PROJECTS

DriveMaster | *ReactJS, Python, Django*

- Developed DriveMaster, a web-based file browser using React and Django, enabling seamless file and folder management.
- Implemented secure folder sharing with registered users and robust access control management for customizable permissions. Enhanced the user interface for better user experience and smooth file operations.

TemplateEASE | *ReactJS, Python, Django*

- Built a web app for editing .docx files with formatting preservation, OCR-based PDF-to-DOCX conversion, and support for uploading PDFs/DOCs as templates.
- Integrated AI-powered document generation, in-document chat, review tools, and red-line editing for comprehensive document workflows.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, Python, SQL, NoSQL
- **Web Framework/ Technologies:** ReactJS, Angular, Django, TypeScript, HTML/ CSS
- **Databases:** PostgreSQL, MySQL, Google Firebase
- **Cloud Platforms:** AWS Cloud, Azure Cloud
- **Version Control/Management Tools:** Git, Github, Azure DevOps
- **Tools and Utilities:** Chrome developer tools, Postman, Visual Studio

ACHIEVEMENTS

- Secured AIR 52 in NIMCET, All India MCA Entrance Exam in 2018
- Secured 1st Position in THINKLTICS, LOGIN'19 (National Level MCA Symposium, PSG College, Coimbatore)).
